

OWNER'S MANUAL & WARRANTY

 AMBIENT ARMS

AMBIENT ARMS LIMITED LIFETIME WARRANTY

YOU MUST REGISTER YOUR SUPPRESSOR TO ACTIVATE YOUR WARRANTY.

Ambient suppressors are manufactured in the United States with high quality materials by expert craftsmen. We build our suppressors to last a lifetime, and we offer a warranty that supports this. To be eligible for the Ambient Limited Lifetime Warranty you must:

1. Purchase your suppressor at an Authorized Ambient Retailer; and
2. Register your suppressor either through an Authorized Ambient Retailer or online.

SUPPRESSOR REGISTRATION

Suppressors covered by the Ambient Limited Lifetime Warranty must be purchased at an Authorized Ambient Retailer and are warranted only to the Original Registered Owner. Warranty claims made by someone other than the Original Registered Owner will not be covered under this warranty. You can register your suppressor through your Authorized Ambient Retailer or through our website at: ambientarms.com/registration. Registration allows Ambient to communicate important information about your suppressor directly to you, including safety notices and recall information. Failure to register may result in you not receiving these important communications directly. Ambient reserves the right to require additional information, such as proof of purchase, to verify warranty eligibility requirements. Ambient also reserves the right to deny warranty claims for suppressors that do not meet these requirements.

WHAT IS COVERED

Ambient Suppressors covered by the Ambient Limited Lifetime Warranty are warranted to the Original Registered Owner against defects in materials and workmanship for the lifetime of the product, except for the following exclusions. This warranty does not cover defects due to normal wear and tear, damage due to misuse, improper use, alteration, accidents, tampering, improper storage, or negligence. Normal wear and tear includes, but is not limited to, chips, dings, scratches, or wear of the finish caused by normal use. Improper use can include the use of unauthorized, non-compatible equipment, e.g., non-OEM parts. Any alterations to the suppressor, including cosmetic refinishing, voids any and all warranties, written or implied.

At Ambient' sole discretion, any damage not covered under this warranty may be repaired for a reasonable rate and fee will be charged for shipping.

LIMITATION OF LIABILITY

Ambient is not liable for any special or consequential damages that result from the performance and use of the products, even if Ambient has been advised of the possibility of such damages. Ambient reserves the right to make substitutions on warranty coverage for any reason, including but not limited to available parts or custom color/camo patterns.

PERSONAL RECORDS

AMBIENT WARRANTY IS ACTIVATED UPON REGISTRATION OF YOUR SUPPRESSOR.

SAFETY FIRST

Before using this equipment, please abide by all of the following safety guidelines and warnings. Consult your Authorized Ambient® Retailer with questions. To ensure your personal safety and the safety of those around you, it is necessary that you READ, UNDERSTAND and FOLLOW all warnings and safety precautions prior to using or working on your suppressor or any shooting equipment used with the suppressor.

WARNING: This suppressor is intended strictly for recreational use only. The warnings that follow are specifically directed to the use of the suppressor.

WARNING: Ambient Arms, Inc. shall not be liable for injuries suffered or caused by misuse, unsafe or improper mounts and suppressor combinations or for injuries sustained when using an altered or modified suppressor or by un-conventional use.

WARNING: Never work on, or attempt to shoot your Ambient suppressor while on medication that may impair your judgment, physical abilities, or reflexes. Never work on, or attempt to shoot your Ambient suppressor while under the influence or while consuming drugs or alcohol. Doing so can result in damage to the suppressor, inflict serious injury or even death to yourself and others.

WARNING: Suppressors operate at high temperatures. Never attempt to touch the suppressor or place it in contact with flammables or other materials prone to melting. Ambient Arms shall not be held liable for burns or other related injuries of misuse.

EQUIPMENT WARNINGS

NOTICE: While the warnings contained herein relate specifically to the suppressor, suppressors are used in active shooting situations where other types of equipment and accessories are also used. If you are using a suppressor, it is highly recommended that you become knowledgeable of the recommendations and warnings that are associated with all equipment that you use.

MAINTENANCE AND REPAIR OF YOUR AMBIENT SUPPRESSOR

WARNING: Your Ambient suppressor is a precision instrument that requires specific tools and expertise. Accordingly, Ambient recommends that all maintenance and repair of your Ambient suppressor be performed by Ambient Arms, Inc. Failure to comply with this warning may cause damage to your suppressor and may inflict serious injury or even death and may void your warranty. Ambient shall not be held liable if this warning is ignored.

STORING YOUR SUPPRESSOR

Store the suppressor in a locked location away from children and unauthorized personnel. Store the suppressor in a dry, clean environment free of excess heat.

PERIODICALLY CLEAN THE SUPPRESSOR

Keep the suppressor free and clear of any debris. After every 1,000 rounds, clean the suppressor by a de-fouling immersion bath. We recommend cleaning products like the HuxWrx Suppressor Sauce.

PRIOR TO SHOOTING YOUR SUPPRESSOR

WARNING: CAREFULLY INSPECT YOUR SUPPRESSOR BEFORE EACH USE.

Always be sure that you take the following actions before each use of your suppressor:

- Carefully inspect the condition of the suppressor for excess wear, bullet strikes, and cracking.
- Ensure that the crush washer is properly secured when utilizing our direct thread HUB.
- Carefully inspect the temperature of the suppressor – do not fire a suppressor that is noticeably overheated.
- Always keep your suppressor free of debris.

WARNING: Use extreme caution when handling the suppressor, do not touch a suppressor immediately after use – allow the suppressor to cool down.

WARNING: Using a bore alignment rod, ensure the threaded barrel is aligned with the inner diameter of the suppressor. While Ambient suppressors are designed with ample bullet clearance, poorly made barrels may give an out-of-spec threading concentricity and cause bullet strikes. Ambient Arms will not be held liable for another manufacturers non-standard tolerance runouts.

WARNING: ALWAYS SHOOT THE RECOMMENDED CALIBER AND USE

Do not shoot the suppressor for a caliber that is not directly recommended by Ambient Arms, Inc. Do not use the suppressor for a use that is not directly recommended by Ambient Arms, Inc., e.g., do not use a non-full-auto rated suppressor on full-auto.

SHOOTING YOUR SUPPRESSOR SAFELY

WARNING: ALWAYS BE SAFE!

NEVER shoot a firearm straight up. NEVER attempt to shoot your suppressor until you are sure that no part of the suppressor can come into contact with another object during the shooting process. DO NOT use the suppressor beyond defined capabilities. NEVER point or aim the suppressor at another person or at any object you do not intend to shoot. NEVER touch or allow anyone to touch your suppressor directly after use. ALWAYS keep out of reach of children.

WARNING: ALWAYS BE SURE OF YOUR TARGET.

Make sure that there are no people, livestock, buildings, roads or other objects behind or near your target. Be sure that your backstop is large enough to catch a stray bullet and that it is thick enough that the bullet cannot completely penetrate through it. When shooting with others, never go down range until the range has no live fire occurring.

WARNING: We recommend wearing proper safety equipment when shooting suppressors. This includes eye protection, hearing protection, and shooting gloves.
